

MALARAVAN R

Python Full Stack Developer

Bangalore | malaravan236@gmail.com | +91 88705 31355 | LinkedIn | GitHub | Portfolio

PROFILE SUMMARY

Python Full Stack Developer with 6 months of internship experience building web applications using Python, **Django REST Framework**, **React**, and MySQL. Experienced in JWT authentication, role-based access control, and REST API development. Built an AI-based project using a **TensorFlow/Keras CNN** for retinal image classification. Comfortable with API testing, debugging, and writing clear technical notes for maintenance.

INTERNSHIP

Besant Technologies

Feb 2026 – July 2026

Python Full Stack Developer

- Developed responsive web interfaces with **React** and backend modules with **Python and Django**, delivering end-to-end features from UI to database and resolving frontend-backend integration issues in **Linux** development environments.
- Designed and integrated **REST APIs** using **Django REST Framework**, implementing **CRUD operations**, **JWT authentication flows**, and **role-based access control**, with **Git** version control; followed **scrum** routines and participated in **code reviews** to improve reliability and implementation quality.
- Managed relational database schema design, queries, and data integration; tested endpoints with **Postman**, optimized backend performance with **data structure and algorithm** improvements, troubleshooted production-like failures, and updated **technical notes** for ongoing maintenance.

TECHNICAL SKILLS

- Programming:** Python, JavaScript (ES6), SQL
- Frontend:** HTML5, CSS3, React.js, Bootstrap, Tailwind CSS
- Backend:** Django, Django REST Framework
- Database:** MySQL, MongoDB
- APIs & Security:** REST API, CRUD Operations, JWT Authentication, Role-Based Access Control
- AI/ML:** TensorFlow, Keras, CNN (Image Classification)
- Concepts:** OOP, Exception Handling, Algorithms
- Tools:** Postman, Git, GitHub, VS Code

PROJECTS

RetinaScan AI – Diabetic Retinopathy Detection

[Source Code](#)

- Built a full-stack AI application that classifies retinal images as **Diabetic Retinopathy (DR)** or **No DR** using a trained **CNN model** built with **TensorFlow/Keras**.
- Designed **REST APIs** with **Django REST Framework** to serve real-time model inference to a **React.js** frontend, storing scan records in **MySQL** and aligning data handling with relational databases.
- Implemented a responsive dashboard for image upload, prediction results, confidence visualization, usage statistics, and searchable scan history using **Bootstrap** and **Tailwind CSS**, ensuring clean UI implementation and consistent user flows.

News Aggregator

[Live Demo](#) | [Source Code](#)

- Built a full-stack **News Aggregator** web application with **user authentication**, **category-based filtering**, **keyword search**, and **bookmark management** for personalized news access.
- Designed **REST APIs** with **Django REST Framework** and integrated the **NewsAPI** to fetch live articles, serving **JSON** data to a **React.js** frontend; **Deployed on Vercel & Render**.
- Validated **API endpoints** with **Postman** and resolved frontend-backend integration issues through iterative debugging and feature enhancements for stable production behavior.

InternConnect

[Source Code](#)

- Developed a full-stack **internship listing and application platform** where students can **browse**, **apply for**, and **track internships** through a login-gated application flow.
- Built **REST APIs** with **Django** and **Django REST Framework**, connected to a **React.js (Vite)** frontend and a **MySQL** database using the **Django ORM**.
- Implemented **form validation**, **dynamic UI states**, and **Axios**-based API integration, and configured **CORS** and **authentication** for secure, reliable client-server communication; supported maintenance and troubleshooting tasks during integration.

CERTIFICATIONS

- MongoDB Associate Developer – MongoDB** [View Certificate](#)
- SQL (Basic) – HackerRank** [View Certificate](#)

EDUCATION

Kongu Engineering College, Erode

Mar 2026

B.E. Computer Science and Engineering

CGPA: 6.76/10
