

MALARAVAN R

Python Full Stack Developer

Salem | malaravan236@gmail.com | +91 88705 31355 | LinkedIn | GitHub | Portfolio

PROFILE SUMMARY

Aspiring Python Full Stack Developer with 6 months of internship experience developing web applications using Python, Django, React, and MySQL. Skilled in REST API development, CRUD operations, authentication, and responsive full-stack development. Passionate about writing clean, maintainable code and building scalable web applications while debugging, validating, and improving application features.

INTERNSHIP

Besant Technologies

Feb 2026 – July 2026

Python Full Stack Developer

- Developed user-friendly interfaces and server-side features using React, Python, and MySQL in an agile workflow, applying problem-solving to address UI and backend integration issues.
- Built and integrated REST APIs, implemented CRUD operations, and supported authentication flows to strengthen application security; collaborated with a cross-functional team using Git version control in an agile workflow, ensuring reliable API development by following Django best practices.

TECHNICAL SKILLS

- **Programming:** Python, JavaScript, SQL
- **Frontend:** HTML5, CSS3, React.js
- **Backend:** Django, Django REST Framework
- **Database:** MySQL, MongoDB
- **APIs:** REST API, CRUD, JWT Authentication
- **Concepts:** OOP, Exception Handling, Async/Await
- **Tools:** Git, GitHub, Postman

PROJECTS

Employee Management System

[Source Code](#)

- Developed a full-stack employee management application with JWT authentication, role-based access control, and employee CRUD operations.
- Built REST APIs using Django REST Framework and integrated them with a React.js frontend and MySQL database.
- Tested and debugged API endpoints using Postman, improving data flow and application reliability.

News Aggregator

[Source Code](#)

- Built a News Aggregator web application with user authentication, category-based filtering, keyword search, and bookmark management for personalized, user-specific news access.
- Developed REST APIs and integrated React frontend with Django backend and NewsAPI, ensuring reliable data retrieval and seamless frontend-backend communication within a web framework workflow, including api testing and json handling.
- Tested and debugged API endpoints, resolved integration issues, and improved application reliability through iterative troubleshooting and feature enhancements, including code review and bug fixing.

Internship Management System

[Source Code](#)

- Built an Employee Management System with secure JWT authentication and role-based access control, delivering a clean, user-friendly experience with secure access handling.
- Developed REST APIs and implemented CRUD operations for employee records using Django REST Framework, integrating React frontend with a MySQL database for structured data management, including mvc alignment and data exchange via json.
- Supported application maintenance by troubleshooting API issues, verifying data flows, and implementing improvements based on testing and feedback, including continuous improvement through api testing and bug fixing.

CERTIFICATIONS

- MongoDB Associate Developer – MongoDB
- SQL (Basic) – HackerRank

EDUCATION

Kongu Engineering College, Erode

Mar 2026

BE Computer Science and Engineering

CGPA: 6.76/10
